### **LV's Paint Project Palette Now at the Recreation Center**

**The display of colors for the next round of house painting in the Village has been moved to a more central location for resident viewing. The palette of eight stucco colors and a larger selection of trim colors can now be seen on the west-facing wall of the Recreation Center. The previous display in Village 44 has been removed.**

**The array of color is visible from the West Parking Lot to the right of a door to the Billiards Room. The Board of Directors approved the new palette at Monday's Board Meeting. Residents are reminded that masks and social distance are necessary when they visit the paint display.**
